Thanks to [@XT4V](#) for the printed pictures used above!

I don't have a 3D printer myself! If you print this, please post a 'Make' with a photo. I'd love to see how it turned out!"

Print this out as you would most other things. Remixed this model from uhlultimate and made it less plastic to save a few cents and reduce plastic waste and it kind of just looks cooler. The spring in this remix is Slider-with-strong-spring. Refer to original model for further reference.

This remix is based on

OTF Fidget Knife - only 3 Parts

by uhltime

Model files

handle.stl

☐ I cut out a huge chunk

blade.stl

☐ I shaved the blade down a bit, you may want to sand it down a bit

slider.stl

☐ This I left untouched
